- **Innovative:** We at Lancette give our best to cater to the need of the consumer in the best possible manner.

SMART THINKING

in the ancient times a door, a window was just a passage way to move from the shelter to the outside world. With the ongoing evolution, thinking of people changed and windows and doors were created to perform certain functions like ventilation, entering of sunlight and few more. In today's world people like architect, builders window consultants, fabricators, even the end user has high expectations from windows and doors, Besides its basic features of water tightness and air tightness an intensive research and development process is carried where the air pressure is measured so that there is maximum wind resistance, various methods are tried to cut down unnecessary noise so that you can have a peaceful living, various tests are conducted like fire resistance, anti burglary so that there is no compromise over your security and of course windows are designed to match your aesthetic requirement.

SERVICES

QUOTATION

We at Lancette respect your time and understand how important every second is. Considering this, we provide you the quote in just 2 hours taking in mind all the points mentioned by you, we deliver you what you need. With the help of our team, we at Lancette even recommend what type of window will suit were. While recommending we consider various points such as wind pressure, height of the building, thermal insulation, shape preferred and few other points which help us to recommend you the best possible option.

INSTALLATION

Time and quality service are two things which can never be compromised at Lancette. We set a target date with our customers, once we are through with the production our team comprising of couple of supervisors and trained staff reaches the site and the installation process is carried on. Installation being a very crucial part it is done with utmost concentration. The process of insulation is crucial because if the installation is not done properly then the properties of the window will no be up to the mark.

AFTER SALE SERVICE

Once you have join hands with Lancette we consider you as a member. We keep you updated with all our activities through various different possible modes of communication. After the installation process a member from the team contacts you to know if you are facing any problem. With the warranty facility we have, we are always there at your door step to solve the problem.
